

CENTURY®

LEGENDARY LEADERSHIP

Century's new L-Arm system has incorporated many features to provide you with an efficient, fast, yet safe hookup. Easy to handle lightweight L-Arms, pivoting receivers and a wheel strap system with no moving parts or ratchets helps you safely hook up no matter what the tire position is of the towed vehicle.

PIVOTING L-ARM SYSTEM

Century engineering using aerospace technology has designed a new high strength Alloy L-Arm that weights only 15 lbs. This is 7 to 10 lbs. lighter than conventional L-Arms and can save your back from lifting an extra 40 lbs. on every tow.

Fast, Efficient, Lightweight, Safe

The three way pivoting system allows the L-arm to be easily positioned to the tire, even in cases where the front tires are turned. A spring loaded pin locks the pivot automatically so there are no extra pins to lose or steps to take for a safe hook-up every time.
